

Nico Sherban

JUNIOR SOFTWARE ENGINEER

PROJECTS

GitHub: <https://github.com/nsherban1>

Web Development Portfolio:

<https://nsherbanportfolio.netlify.app>

Café Directory Web Application

Python, Flask, SQLAlchemy, SQLite, Bootstrap

- Developed full-stack café directory application using Flask and Jinja templating
- Integrated SQLite database with SQLAlchemy ORM for café data management and filtering
- Implemented interactive map functionality and amenity-based search features
- Designed responsive user interface using Bootstrap for mobile and desktop compatibility
- Deployed functional web application showcasing backend development and database integration

Recipe Search Web Application

JavaScript, Sass, Parcel, Forkify API

- Developed responsive recipe web application using modular ES6+ JavaScript architecture and MVC design pattern
- Integrated Forkify API to enable recipe search, detailed recipe views, and dynamic ingredient scaling
- Implemented bookmarking functionality using local storage persistence
- Built recipe upload system with form validation and interactive UI components
- Deployed production-ready application using Parcel and Netlify

Stock Market Dashboard

Python, Flask, Plotly, Marketstack API

- Developed full-stack stock market dashboard application using Flask and external financial data APIs
- Implemented dynamic retrieval and display of stock metrics including open, high, low, close, and volume data
- Built interactive Plotly visualizations for 30-day historical stock price analysis
- Designed responsive dark-themed UI with card-based dashboard layout for multi-stock monitoring
- Integrated API-driven data processing and real-time chart rendering functionality

PROFILE

Junior Software Engineer with a background in geophysics and 8+ years of international professional experience. Skilled in Python, JavaScript, React, Node.js, SQL, and full-stack web development, with experience building and deploying web applications and data-driven projects. Adept at analytical thinking, communication, and delivering high quality, user-focused solutions. Currently expanding technical skills through intensive online bootcamps and personal projects.

EDUCATION

University of Calgary

BSc Science in Geophysics

Sep 2011-Jun 2015

- Major GPA: 3.34
- Received Jason Lang Scholarship in 2014 for outstanding academic performance.

SKILLS

- **Languages:** Python, JavaScript, SQL, MATLAB
- **Frontend:** React.js, HTML, CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, Authentication/JWT
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Data & Visualization:** Pandas, NumPy, Scikit-learn, Matplotlib, Tableau, Power BI
- **Tools:** Git, GitHub, JSON, Render, Netlify
- **Cloud:** AWS Fundamentals
- **Languages:** English (Native), Spanish (Fluent)

CERTIFICATES

- Python Bootcamp – Udemy (2025)
- Node.js & REST APIs – Udemy (2024)
- JavaScript Development – Udemy (2024)
- SQL Bootcamp – Udemy (2023)
- Full-Stack Web Development – Udemy (2022)

WORK EXPERIENCE

English Teacher

Idiomo Canada | Jul 2022-Present

- Teach Business and general English to adult learners using discussion-led methods.
- Design lessons that integrate data, case studies, and critical thinking-skills transferable to client communication and documentation in tech teams.

English Teacher

ILA Vietnam | Sep 2017-Sep 2021

- Taught a wide range of ESL classes from beginner to advanced, focusing on clear communication and learner engagement.
- Trained junior teachers and created resource materials.
- Demonstrated leadership and instructional design.

Easy English – ESL Learning Web App

HTML, CSS, JavaScript, Netlify

- Developed responsive ESL learning web application focused on vocabulary, grammar, and conversational practice
- Built interactive lesson modules, speaking prompts, and dialogue-based activities using JavaScript
- Designed mobile-friendly UI for improved accessibility and user experience across devices
- Deployed application using Netlify

Geophysical Data Analysis Capstone

Python, MATLAB, Data Visualization

- Developed programs to analyze seismic, GPS, and electromagnetic datasets.
- Created visualizations and presented analytical insights on subsurface resource potential.
