Nico Sherban

SOFTWARE DEVELOPER

PROFILE

Software Developer with a background in geophysics and 9+ years of international teaching experience. Built and deployed Northstar Languages, an AI-powered language-learning application integrating voice conversations, personalized feedback, and subscription billing. Skilled in JavaScript, Python, React, Node.js, and SQL, combining analytical problem-solving with firsthand knowledge of learner needs.

EDUCATION

University of Calgary

BSc Science in Geophysics

Sep 2011-Jun 2015

- Major GPA: 3.34
- Received Jason Lang Scholarship in 2014 for outstanding academic performance.

SKILLS

- Programming: JavaScript, Python, SQL, MATLAB
- Frontend: React, HTML, CSS, Responsive Design
- Backend: Node.js, Express, Flask, REST APIs, Supabase Auth
- Databases & ORM: PostgreSQL, MySQL, MongoDB, SQLite, SQLAlchemy
- AI & Payments: OpenAI API, Realtime API, Stripe Checkout & Webhooks
- Development Tools & Services: Git, GitHub, Supabase, Render, Netlify
- Data Analysis: Pandas, NumPy, Matplotlib
- Spoken Languages: English (Native), Spanish (Fluent), Portuguese (Intermediate)

WORK EXPERIENCE

English Teacher

Idiomo Canada | Jul 2022-Present

- Teach Business and general English to adult learners using discussion-led methods.
- Design lessons that integrate data, case studies, and critical thinking-skills transferable to client communication and documentation in tech teams.

English Teacher

ILA Vietnam | Sep 2017-Sep 2021

- Taught a wide range of ESL classes from beginner to advanced, focusing on clear communication and learner engagement.
- Trained junior teachers and created resource materials.
- Demonstrated leadership and instructional design.

Northstar Languages- AI Language Learning Platform

Creator & Developer

JavaScript, Node.js, Express, Supabase, OpenAI API, Stripe, Render

Website URL: northstarlanguages.onrender.com

- Developed a language-learning application integrating AI voice and text practice with structured CEFR A1–C2 lessons and personalized session feedback.
- Built authenticated REST APIs using Express and Supabase to manage learner profiles, practice sessions, feedback history, and curriculum progress.
- Integrated Stripe Checkout, customer billing management, and signature-verified webhooks to manage subscription access.
- Implemented server-side practice-time tracking and billing-period usage allowances, linking recorded voice-session time to lesson completion.
- Integrated OpenAI Realtime session creation with temporary client credentials and configurable instructions for learner level, lesson context, and language preferences.

Stock Market Dashboard

Python, Flask, Plotly, Marketstack API

Website URL: stockmarkettracker-vnhq.onrender.com

- Developed full-stack stock market dashboard application using Flask and external financial data APIs
- Implemented dynamic retrieval and display of stock metrics including open, high, low, close, and volume data
- Built interactive Plotly visualizations for 30-day historical stock price analysis
- Designed responsive dark-themed UI with card-based dashboard layout for multi-stock monitoring
- Integrated API-driven data processing and real-time chart rendering functionality

Certificates

- Python Bootcamp – Udemy (2025)
- Node.js & REST APIs – Udemy (2024)
- JavaScript Development – Udemy (2024)
- SQL Bootcamp – Udemy (2023)
- Full-Stack Web Development – Udemy (2022)
